# **Downloading CuVee Software Programs**

## into Magnetic Card-based Apps

(RPN-65, -67, -97)

The walk-through below assumes that you've set **Safari's Downloads folder** to your *iPhone* or *iPad*. The steps are essentially the same if you prefer *iCloud Drive* (which has the advantage that the files will be accessible from any of your devices.)

To define the location of the Downloads folder:

- Go to Settings > Safari > Downloads and check your download location.
- Choose On My iPhone (or On My iPad) for this walk-through.

In the **Files app**, you should see something like this. Note that you can **rename** the **Downloads folder** by long-pressing on it. Similarly, you can make it appear under **Favourites**.

### The Task

On your **iPad**, download the program **"RPN Shopping App**" – found in the **Miscellaneous** section of **LibraryU** on the RPN-67 website (<u>https://www.cuveesoft.ch/rpn67/p11.html</u>) – into **RPN-97 Pro**.

On the web page in Safari, tap the **Download Card** button. Confirm by tapping **Download** in the dialog.

Dpen Channel Design (E≭≁	Do you want to download	· · · · · · · · · · · · · · · · · · ·	<i>units.</i> The flow,

#### Note:

At this point, you may – as an **alternative method** – *long-press* the file, then choose *Share*, then *Mail* to email it to yourself. After receiving the email, tap the icon in the message to import the program.

In this walk-through, we're going to move the unzipped file to RPN-97 Pro's documents folder.

We do this by **long-pressing** the file, then choosing **Move**.

You'll see the moved file RPN\_Shopping.rpn97, ready for import into RPN-97 Pro.

(You'll also see three files containing *sqlite* in their names. These are the database files holding all your programs. *Don't tamper with them!* If you delete the files, RPN-97 Pro will revert to the default database. On the other hand, it's always a good idea to keep a backup copy of these files in a safe place.)

We're done! Tap the file RPN\_Shopping.rpn97, and RPN-97 Pro will open.

Go to a card to overwrite, or create a new one, then tap the **Share** button.

Choose Import from Files and tap Write Card to save the data to the card.

#### NOTE

The action Import from Files picks the alphabetically first program it finds.

If you have several files ready for import, you may **rename** the file you're interested in, for example by starting its name with the number 1. (*Long-press* the file icon.) This will not affect the title of the program.
