

# Downloading CuVee Software Programs

## into Magnetic Card-based Apps

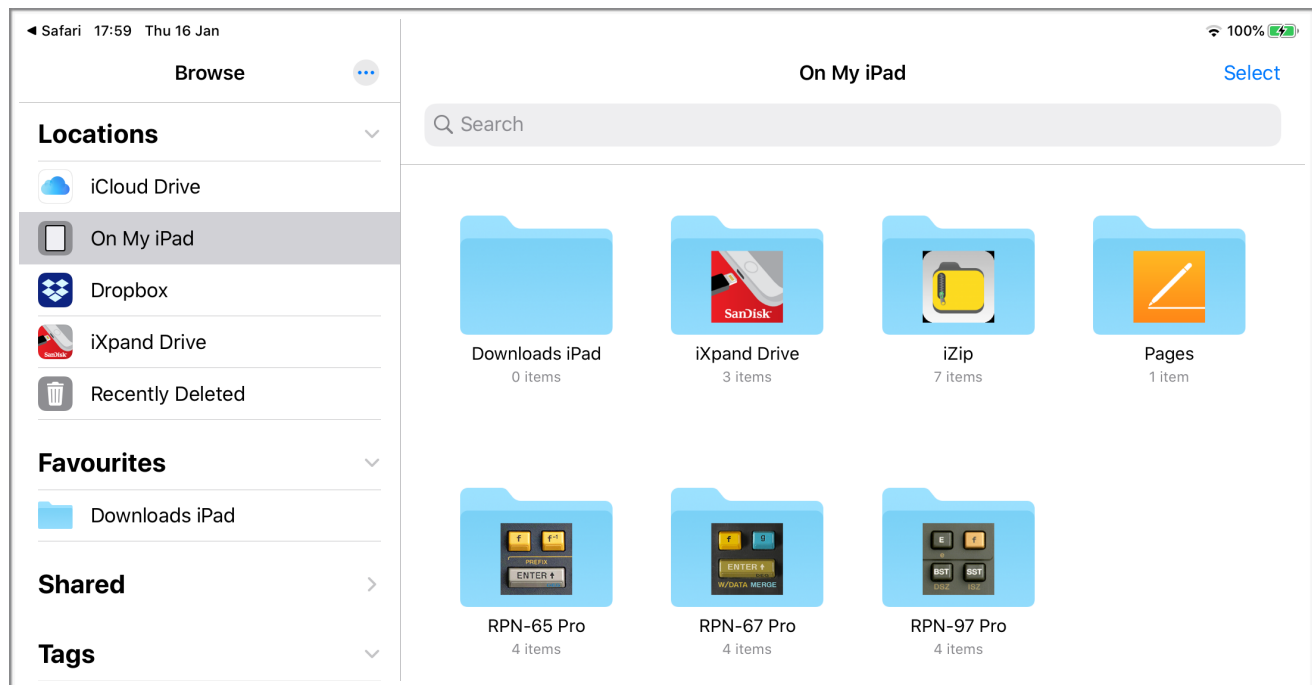

(RPN-65, -67, -97)

The walk-through below assumes that you've set **Safari's Downloads folder** to your *iPhone* or *iPad*. The steps are essentially the same if you prefer *iCloud Drive* (which has the advantage that the files will be accessible from any of your devices.)

To define the **location** of the Downloads folder:

- Go to *Settings* > *Safari* > *Downloads* and check your download location.
- Choose *On My iPhone* (or *On My iPad*) for this walk-through.

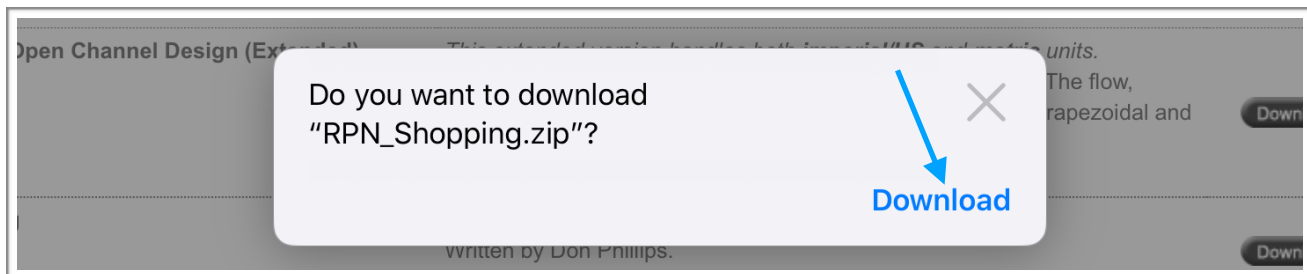

In the **Files** app, you should see something like this. Note that you can **rename** the **Downloads folder** by long-pressing on it. Similarly, you can make it appear under **Favourites**.

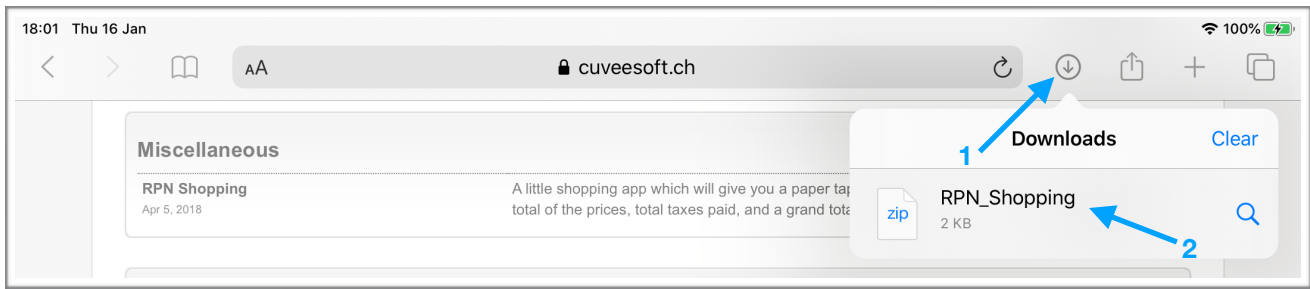

## The Task

On your **iPad**, download the program „**RPN Shopping App**“ – found in the **Miscellaneous** section of **LibraryU** on the RPN-67 website (<https://www.cuveesoft.ch/rpn67/p11.html>) – into **RPN-97 Pro**.

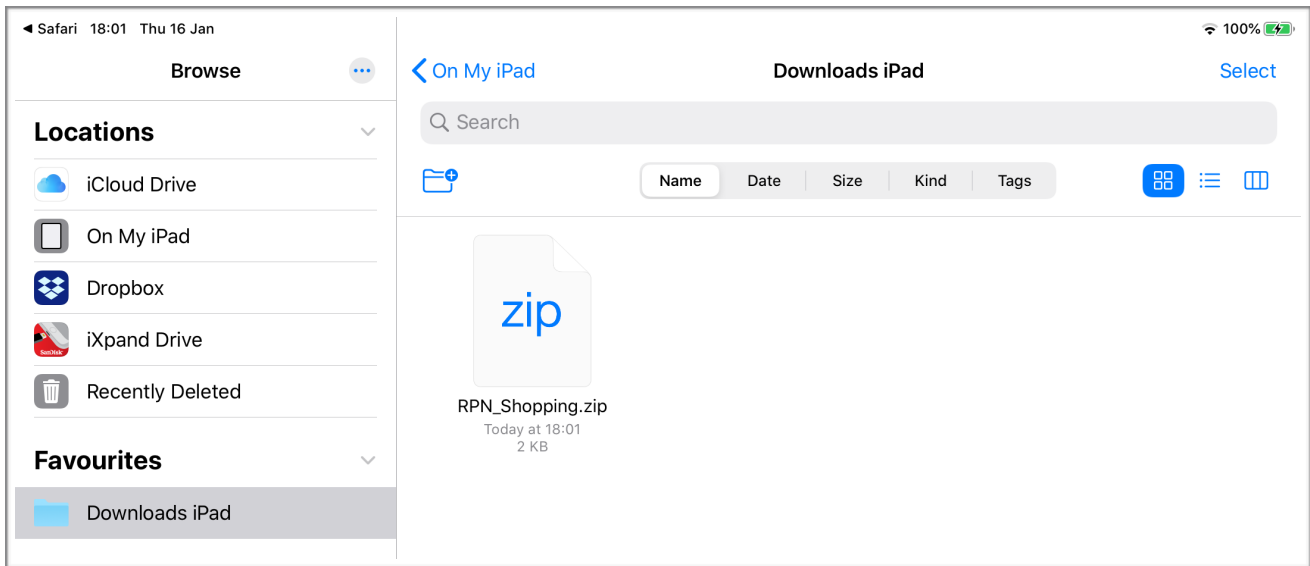

On the web page in Safari, tap the **Download Card** button. Confirm by tapping **Download** in the dialog.

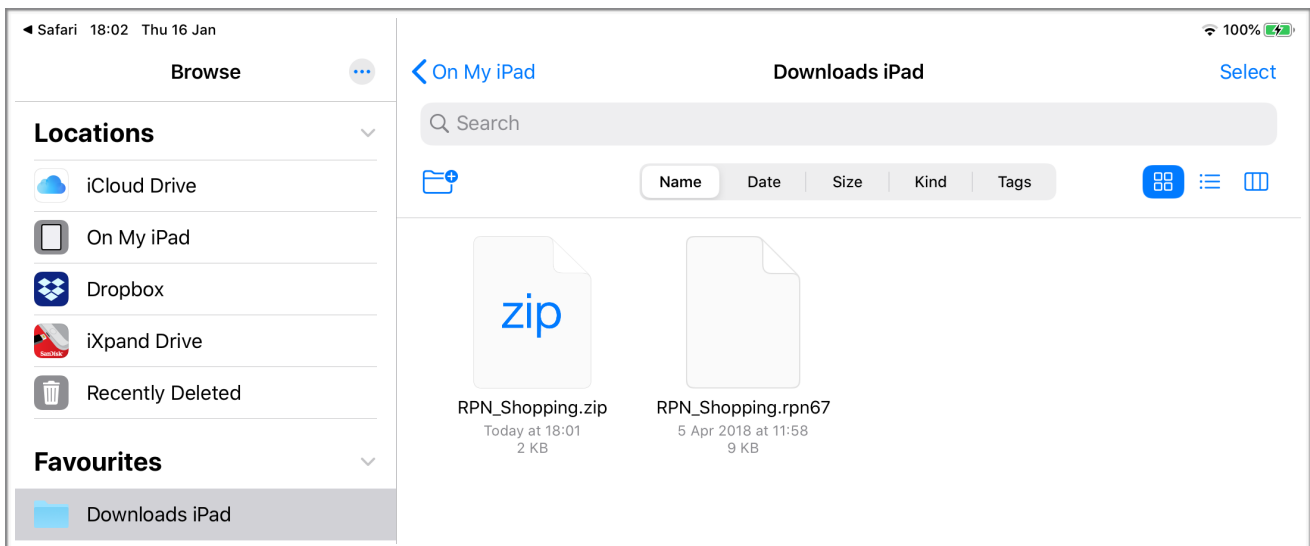

Tap Safari's **download button**, then the **program name**:

You're taken to the **Downloads folder**:

Tap the ZIP file to **uncompress it**:

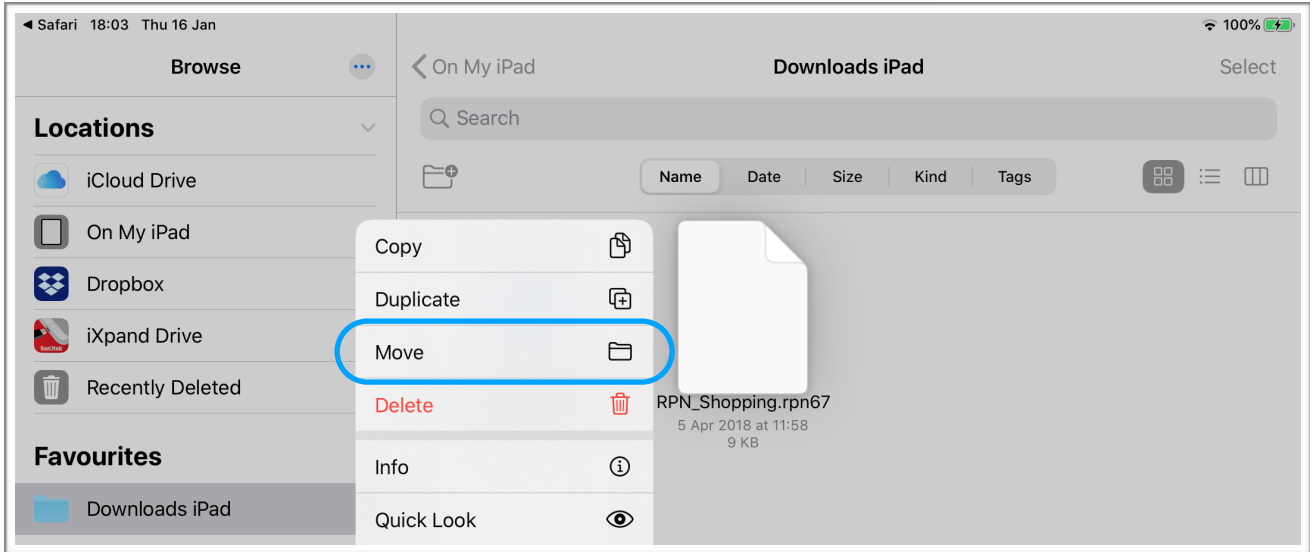

**Note:**

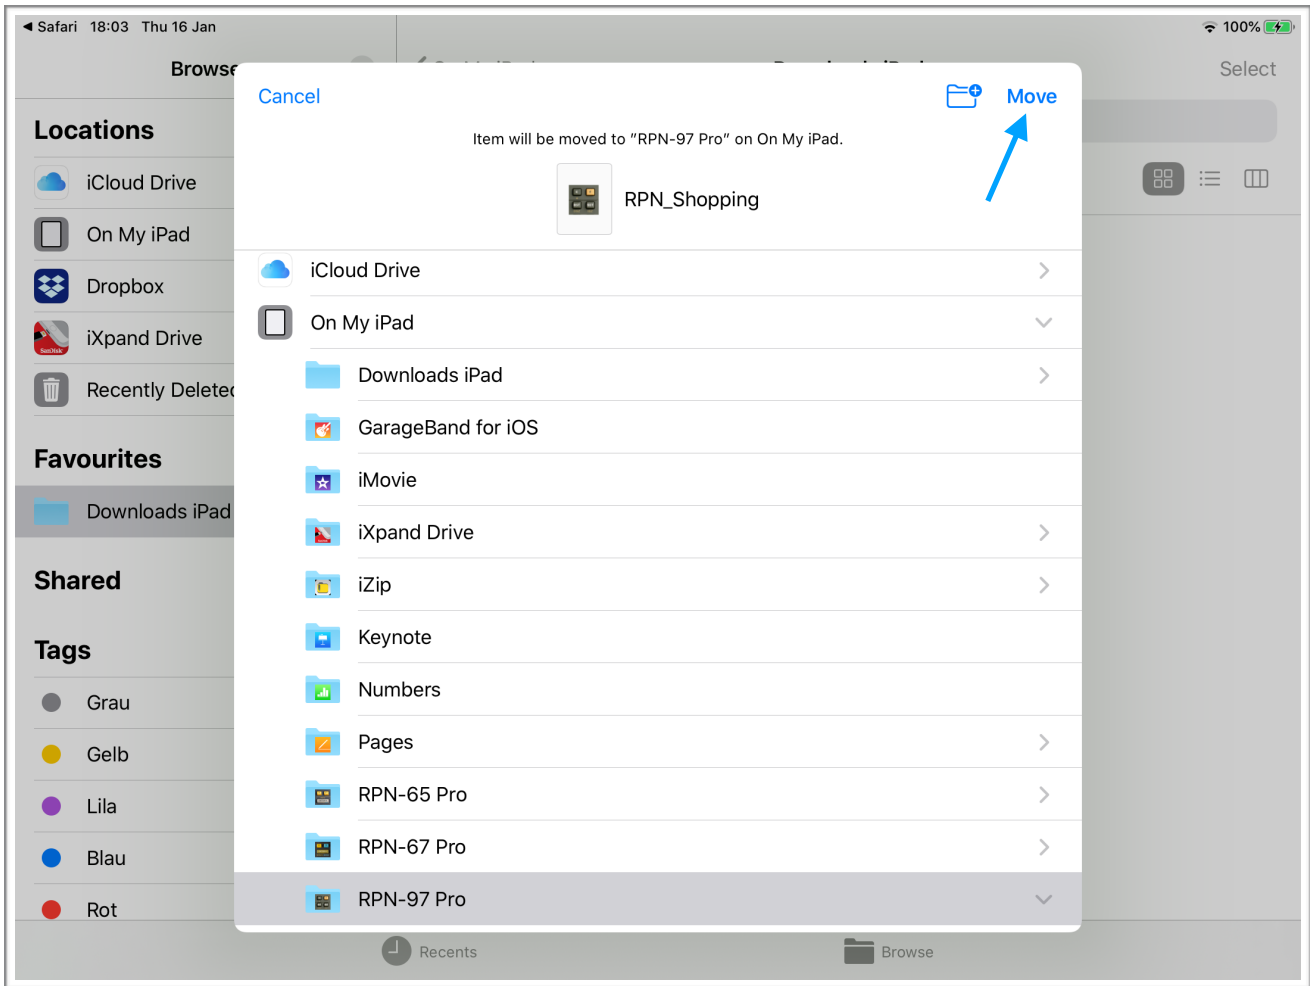

At this point, you may – as an **alternative method** – *long-press* the file, then choose *Share*, then *Mail* to email it to yourself. After receiving the email, tap the icon in the message to import the program.

In this walk-through, we're going to **move** the unzipped file to **RPN-97 Pro's documents** folder.

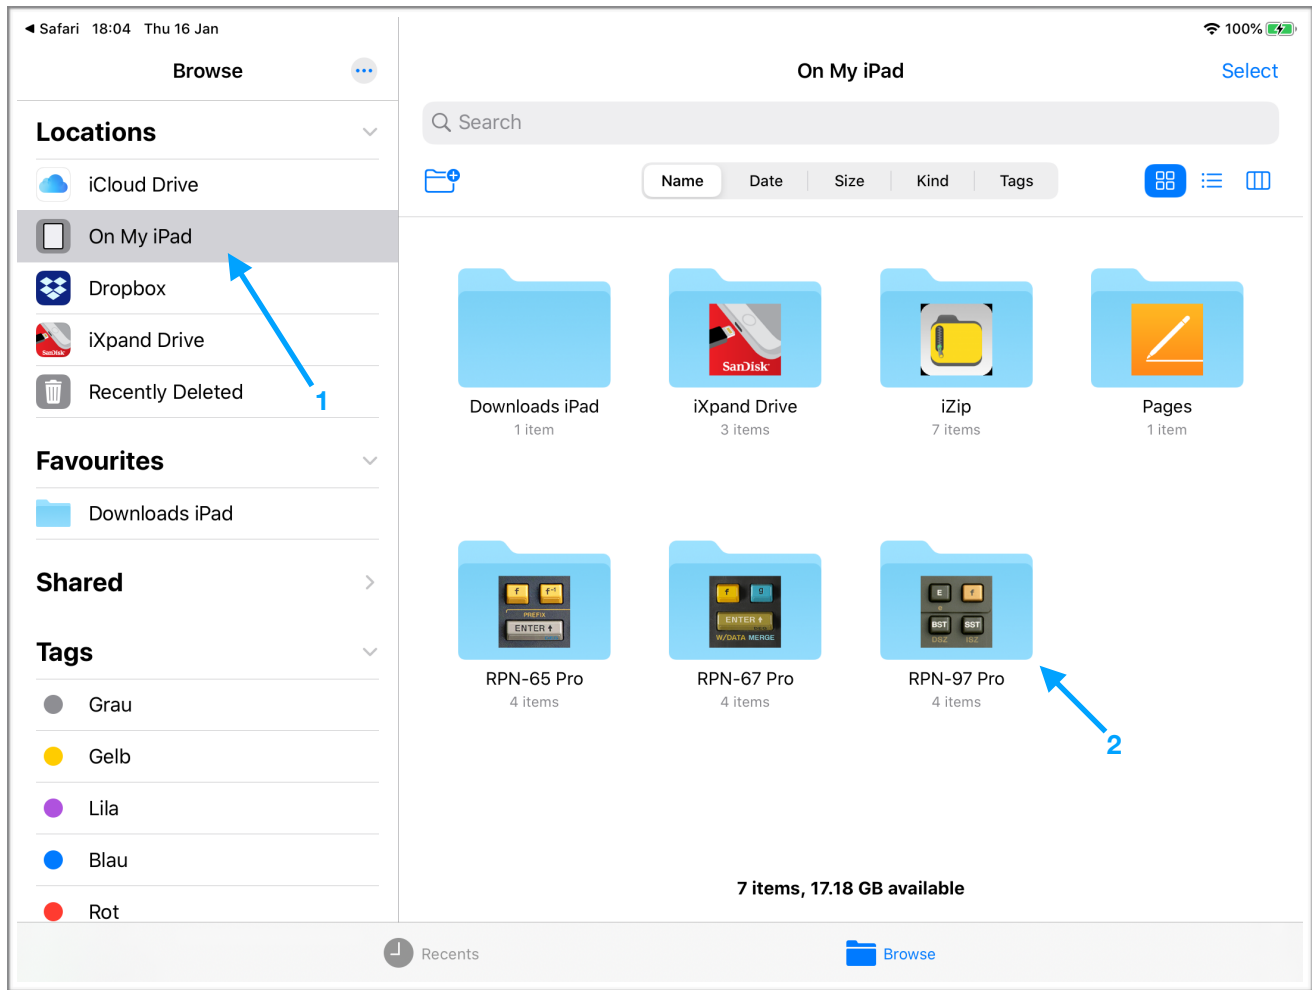

We do this by **long-pressing** the file, then choosing **Move**.

Destinations for the move are presented. Select **RPN-97 Pro**, then tap **Move** (top-right):

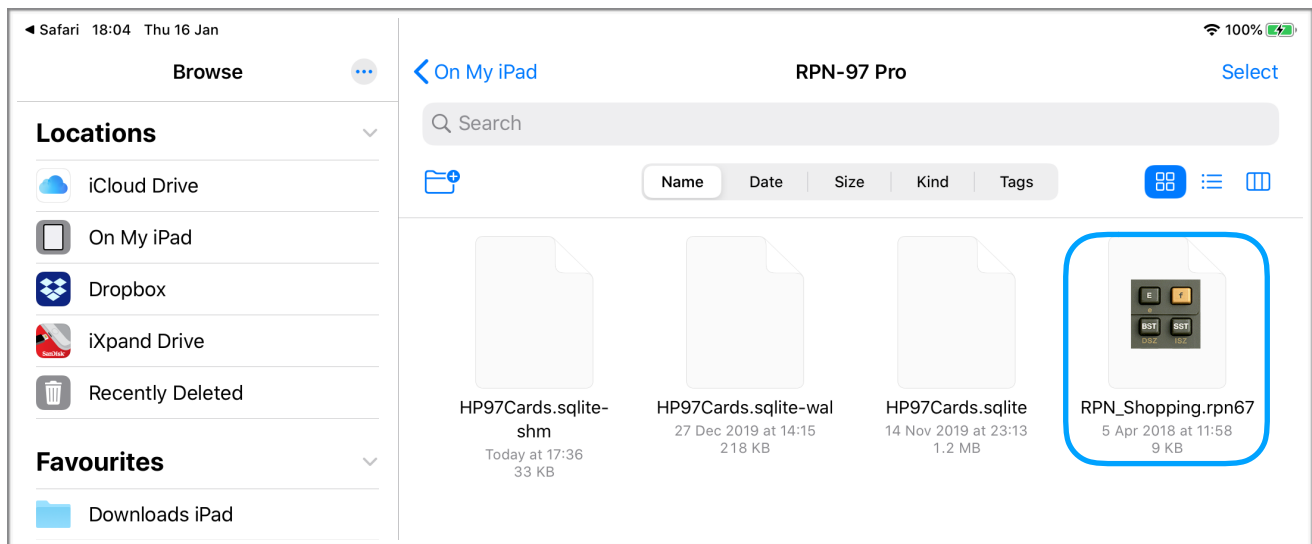

Select *On My iPad* under **Locations** (iPhone: tap *Back*), and tap the **RPN-97 Pro** folder to open it.

You'll see the moved file **RPN\_Shopping.rpn97**, ready for import into RPN-97 Pro.

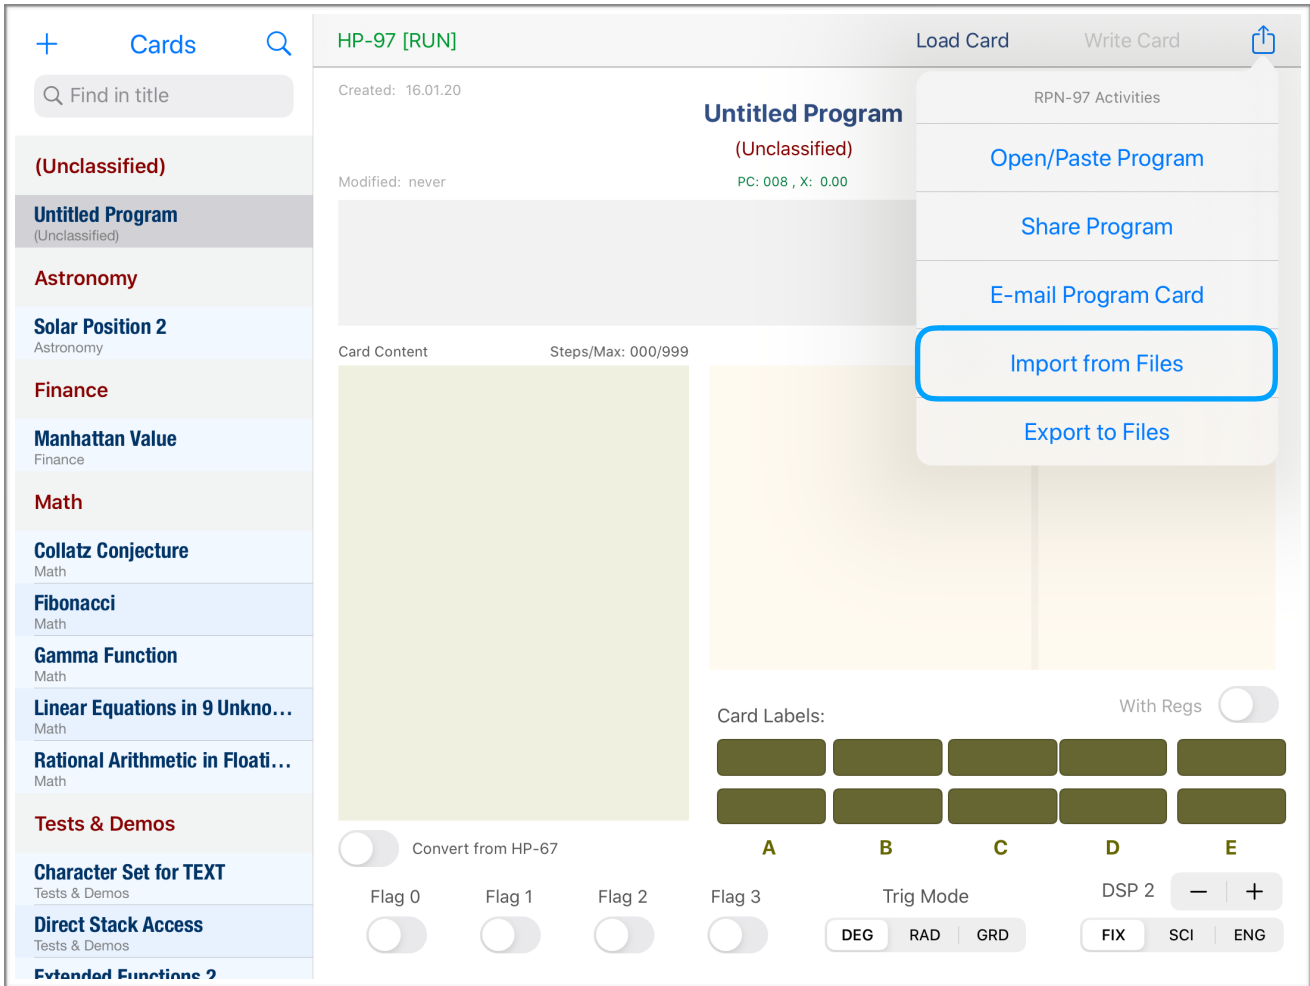

(You'll also see three files containing *sqlite* in their names. These are the database files holding all your programs. **Don't tamper with them!** If you delete the files, RPN-97 Pro will revert to the default database. On the other hand, it's always a good idea to keep a backup copy of these files in a safe place.)

We're done! Tap the file **RPN\_Shopping.rpn97**, and RPN-97 Pro will open.

Go to a card to overwrite, or create a new one, then tap the **Share** button.

Choose **Import from Files** and tap **Write Card** to save the data to the card.

## NOTE

The action **Import from Files** picks the **alphabetically first** program it finds.

If you have several files ready for import, you may **rename** the file you're interested in, for example by starting its name with the number 1. (*Long-press* the file icon.) This will not affect the title of the program.
